In today's meeting, we discussed the specific layout of our website, focusing on both aesthetic features and technical features.

Needs for site:

Search bar (For finding a city or weather type)
Page header with name of app.
Interactive map of CO
Drop down with options
Login (maybe) -> login page or dropdown

What we like/ want on the real thing:

Profile photos
Login page with both sign up and login on the same thing
Pins on major landmarks
Multiple filters
Favoriting location
Key for weather
Filters with checkboxes
Click on key item for more info
Icons for weather
Links to our sources (API)
